EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Joseph Oriti on September 16, 2008.

The application has been amended as follows:

In the claims:

Claims **4, 10, 13** have been amended as follows:

4. (Currently Amended) The system of claim 1 wherein the page-grading engine grades the web pages as objects from an interconnected collection of weighted objects, the weights of the objects described by ~~[[a]]~~ the personalization description v, and the interconnection of the objects described by a description P, the page-grading engine:

applying ~~[[a]]~~ the grading function Q' to the personalization description v for the objects to determine a set of grades for the objects;

assigning at least one object the corresponding determined grade for that object; ~~wherein the grading function Q' approximates an ideal grading function Q, wherein non-zero entries of a vector indicative of the personalization description v correspond at least to a favorites list associated with a user's web browser and wherein applying ideal~~

grading function Q to the personalization description v produces ideal grades with respect to description P for every object in the interconnected collection of weighted objects; and

~~rendering an indication of at least one graded object.~~

10. (Currently Amended) The system of claim 1 wherein:

the page-grading engine further determines a grade for at least one of the objects using Q' ; wherein the weights of the objects are described by $[[a]]$ the vector indicative of the personalization description v , and

~~non-zero entries of the vector v correspond at least to a favorites list associated with a user's web browser,~~ the interconnection of the objects is described by a matrix P , and the ideal grade of object i with respect to matrix P equals $Q[i]$ times v where $Q[i]$ is the i th row of an ideal matrix Q .

13 (Currently Amended) The system of claim 1 wherein the page-grading engine grades the web pages as objects from an interconnected collection of weighted objects, the page-grading engine comprising:

$[[a]]$ the personalization description v of the weights of the objects,~~wherein non-zero entries of a vector indicative of the description v correspond at least to a favorites list associated with a user's web browser;~~

a description P of the interconnection of the objects; and

a processor for approximating, using the ideal matrix Q and the approximation matrix Q', an ideal grading function Q with an approximate function Q', where applying ideal grading function Q to the personalization description v produces ideal grades with respect to [[a]] the description P for every object in the interconnected collection of weighted objects, and for assigning at least one object the grade produced for that object by an application of Q' to v.

Allowable Subject Matter

2. Claims 1-8, 10-14 are allowed.
3. The following is an examiner's statement of reasons for allowance: Prior art of record do not teaches the combination of claimed element including "the page-grading engine grades the web pages as grading objects from an interconnected collection of weighted objects by approximating the matrix Q with respect to a parameter k, by computing a matrix U_k , computing a matrix V_k , computing a diagonal matrix S, and defining Q' as the matrix product $V_k S U_k^T$ " as recited in independent claim 1.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Khanh B. Pham whose telephone number is (571) 272-4116. The examiner can normally be reached on Monday through Friday 7:30am to 4:00pm.
